

Reader

Product Code: L-RX201

Description: Reader RS485 / RS232

The **L-RX201** RS485 / RS232 Reader detects and decodes RF transmitted signals from the Wavetrend family of tags. Interpreted data is converted into electrical information that is passed down the RS485 Reader-net (Network of readers).

L-RX201 Readers can be used in stand-alone mode or in a multi-drop asynchronous network where the "Node ID" is automatically assigned. The electrical connection between the host PC and the first reader may be RS232 or RS485.

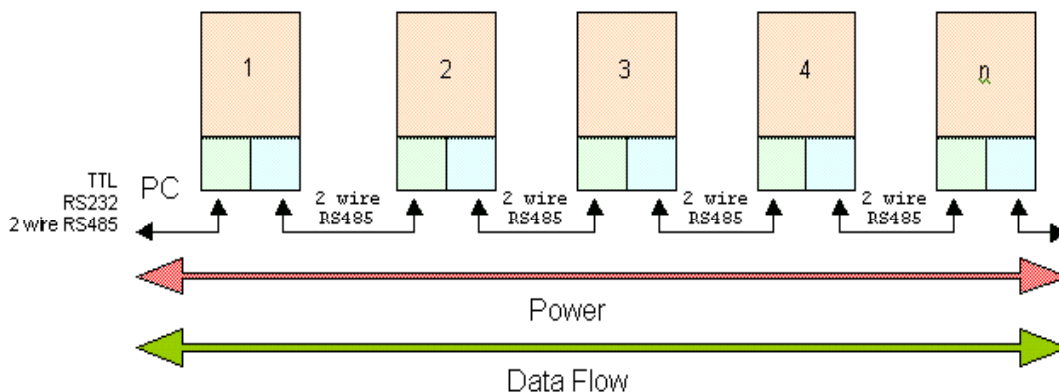

This reader is also available in a proximity or close range model without antenna. Product code: **L-RX201-PR**. This reader will typically be used in an environment where the tag has to be very close range to the reader.

Features

- Up to 255 unique Receiver Addresses possible.
- Remote readers are powered via the CAT5 cable, centralised or distributed PSU topology may be used.
- Reader status indication by LED's at RJ45 connectors.
- ESD protection as specified by FCC and CE requirements.
- Conformance to the RF standards required by the internationally accepted regulatory bodies: i.e. FCC, CE and ETSI.
- Sensitivity adjustment, and reader addressing done remotely via PC software application.
- Reader programming (configuration) done dynamically via PC software.
